

Just what does it take...

75 grapes = 1 cluster – ok what does that amount to?

1 grape cluster = 1 glass – a cluster a day keeps the doctor away

4 clusters = 1 bottle – ah... now we're getting somewhere

40 clusters = 1 vine – just think of those horticultural beauties

1 vine = 10 bottles – if only they were Jeroboams or better yet Melchior (to be explained in a future Trivia edition)

1200 clusters = 30 vines = 1 barrel – (oaked or unoaked)

1 barrel = 60 gallons = 25 cases – (this is getting better all the time)

400 vines = 1 acre = 5 tons = 332 cases (Nirvana)

And it always comes full circle to those 75 grapes of sheer enjoyment.
